# Operational update Q3 2022

# Q3 High lights

- Upgrade in key cluster Uppsala – Successful reopening of club Svandammen in mid September
- New club in Sarpsborg Norway from 1 September – gym with CrossFit concept
- Macro environment is challenging - Cost increase due to electricity prices and inflation – adjustments in opening hours for sauna as a first step to reduce energy consumption
- Foundation for member growth strengthened, through upgrades and a clarified operational model

## Continuing building on key strategic initiatives taken, despite a challenging macro environment

- Member base has grown with 5% from Q3-21 and a positive development in members per club, despite portfolio optimization resulting in 14 less clubs
- Challenging macro environment with high inflation rates and increased energy cost – However energy cost is limited to appr. 40% of total clubs due to turnover rent agreements
- Price adjustments initiated on current base – work will continue over coming quarters.
- Strategic focus to optimize current portfolio with a clarified operational model together with refurbishment and investment in equipment with object to increase members per club
- With cost saving initiatives taken, additional member growth gives membership revenues with an immediate effect on EBITDA level – but macro environment affect us
